* Frame fixing screws are not included in the kit		* Frame fixing screws are not included in the kit	

This Rack Frame Kit is for ROTEL 15 Series components only.

Please see back page

STEP 1: (Drawing 1)

Attach the rack rails to the left and right sides using a screw with 10-32 thread. (Not included in the kit)

STEP 2: (Drawing 2)

Remove the feet from ROTEL component. Slide the ROTEL component slowly in to the rack until the lower edge of front panel touches the bottom of the rail. Do not try and push the product beyond this point.

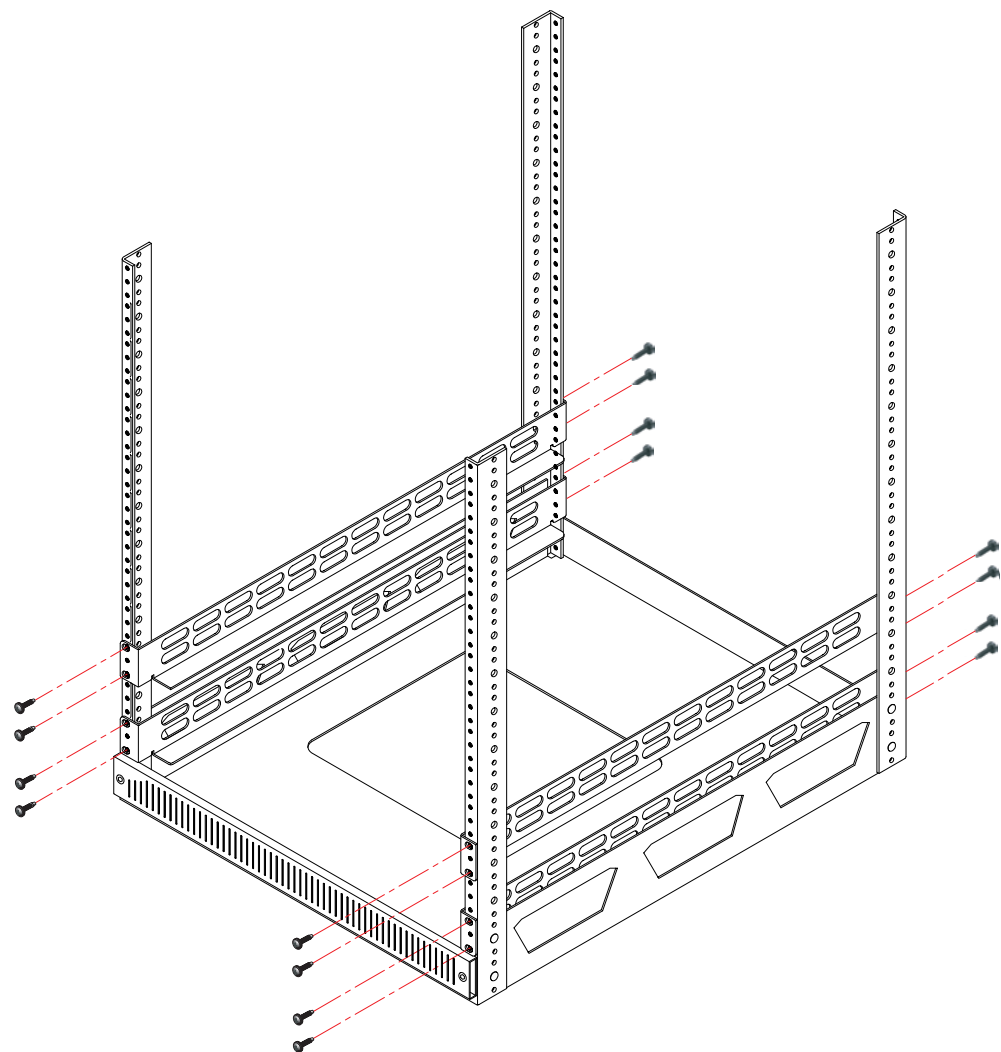

STEP 3: (Drawing 3)

Attach the “L” bracket to stop the component sliding back using the affixed screw (4 x6mm), then screw it to Rack Frame by using (4 x 6mm) screw.

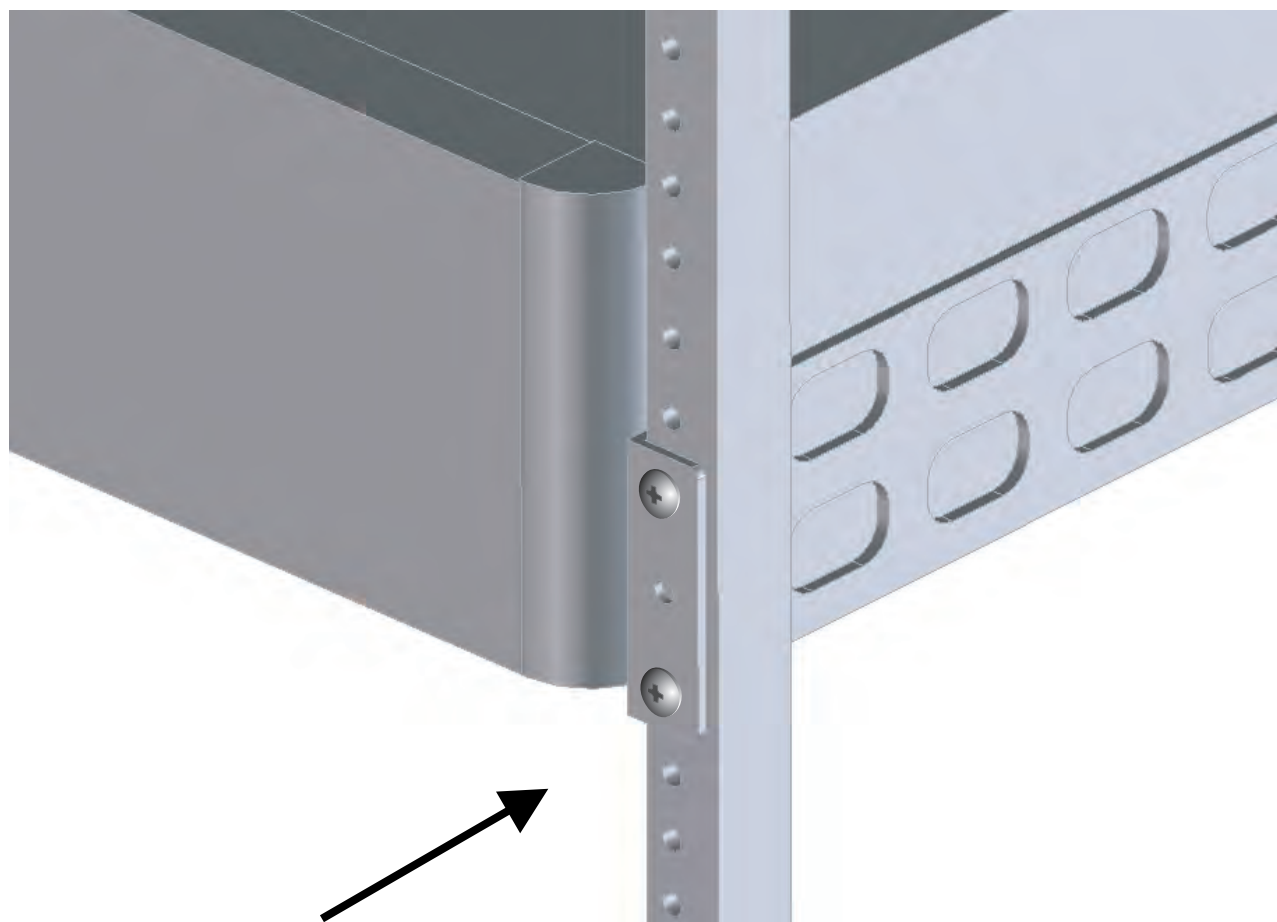

STEP 4: (Drawing 4)

Finish off by fixing the correct cover plate using screw with 10-32 thread. (Not included in the kit)
